# Overview

Effective governance structures within engineering organizations are pivotal for success in the built environment. This webinar focuses on principles of decision-making, ethical practices, and regulatory compliance in relation to engineering practice. Participants will gain insights into optimizing organizational structures, fostering accountability, and aligning engineering practices with broader governance frameworks.

## Learning Objectives

- Understanding governance principles.
- Navigating through complex governance challenges.

## Learning Outcomes

Participants will enhance their ability to navigate complex governance challenges, ensuring ethical conduct and sustainable success in engineering practice.

## Who Should Attend

- Engineers
- Architects
- Quantity Surveyors
- Contractors
- Executives / Senior Management
- Middle Management
- Operational Level

# Programme

| Time                    | Activity                                                     | Facilitator                                                                             |
|-------------------------|--------------------------------------------------------------|-----------------------------------------------------------------------------------------|
| 8.55 a.m. - 9.00 a.m.   | Arrival and registration                                     | <b>EBK Secretariat</b>                                                                  |
| 9.00 a.m. - 09.05 a.m.  | Introductions & Opening Prayer                               | <b>Eng. Grace Onyango, PE</b><br><i>Director, Capacity Building &amp; Accreditation</i> |
